5 SIGNS OF A MALWARE INFECTION

UNCOVER THE WARNING SIGNS TO KEEP YOU SAFE !

Swipe

SIGN 1

SLOW SYSTEM PERFORMANCE

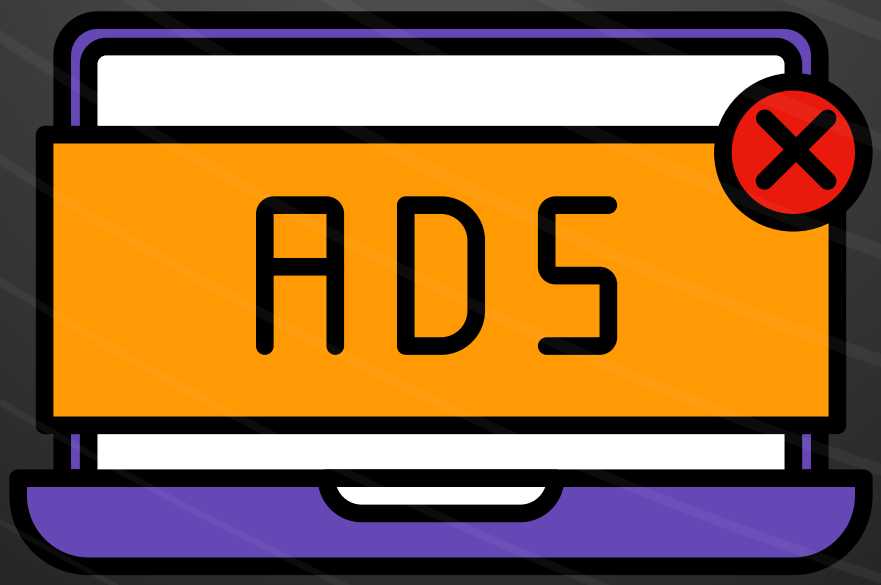
Malware consumes your system's resources, causing it to lag or freeze unexpectedly.

Swipe

SIGN 2

UNEXPECTED POP-UPS

Frequent ads or alerts appearing out of nowhere might indicate adware or a more severe malware infection.



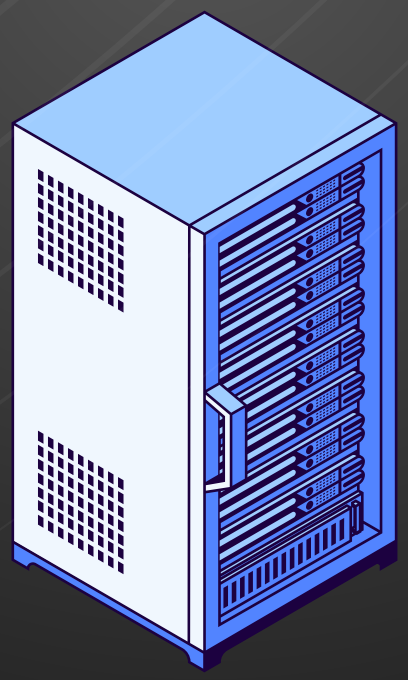
Swipe

SNSin

SIGN 3

UNUSUAL NETWORK ACTIVITY

Malware can send data to external servers. Look for spikes in your data usage or unknown connections.



Swipe

SIGN 4

PROGRAMS CRASHING OR FAILING TO OPEN

Malware can corrupt files or interfere with legitimate applications, leading to unexpected errors.
