

# 5 CYBERSECURITY MYTHS DEBUNKED

SEPARATING FACT FROM FICTION AND  
PROTECTING WHAT MATTERS MOST.

## Myth

Small businesses don't need cybersecurity.

## Reality

Small Businesses ( $\leq 1000$  users) faced 46% of all Data Breaches in 2024.

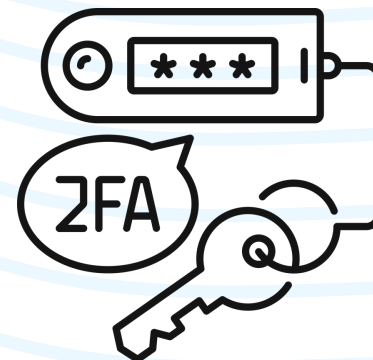

## Myth

Strong passwords alone are enough.

## Reality

Passwords can be cracked or stolen. Always enable MFA for an extra layer of security.

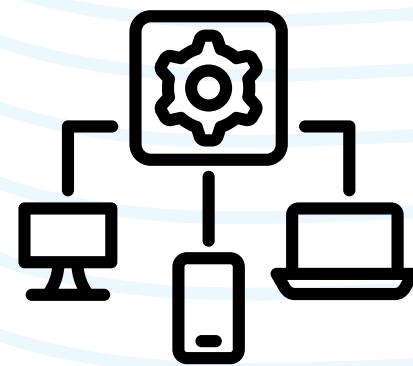

## Myth

Antivirus software  
is all you need.

## Reality

Cyber threats like phishing,  
ransomware, zero-day  
attacks require robust  
solutions like Endpoint  
Security solutions (EDR/XDR).

## Myth

Cybersecurity is  
an IT issue only.

## Reality

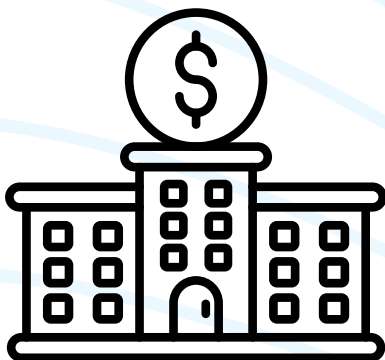

Cybersecurity is every  
User's responsibility making  
cybersecurity awareness  
training essential.

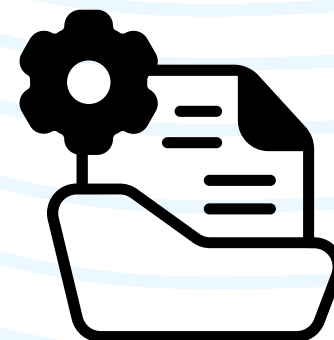

## Myth

Hackers only  
target high-value  
companies.

## Reality

Any Data has value.  
Organization's size  
doesn't matter.
