

10 Tips for Secure Browsing

**Cybersecurity is
Your responsibility !**

Use Strong Passwords

* * * *

Create unique and complex passwords for each account.

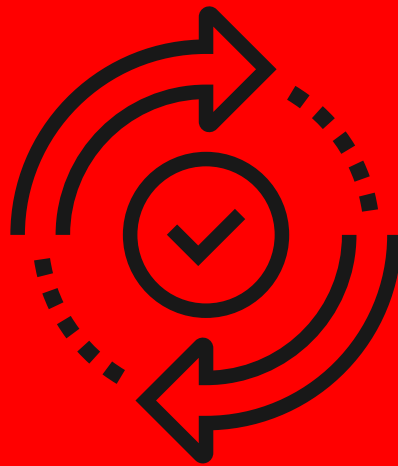

Enable Two-Factor Authentication (2FA)

Add an extra layer of security with 2FA.

Update Software Regularly

Keep your browser and software up to date.

Use HTTPS

**Ensure websites use HTTPS
for a secure connection.**

Avoid Public Wi-Fi

**Use a secure, private network
for sensitive transactions.**

Install a VPN

Use a VPN to encrypt your internet traffic.

Be Cautious with Links and Attachments

**Don't click on suspicious
links or download
unknown attachments.**

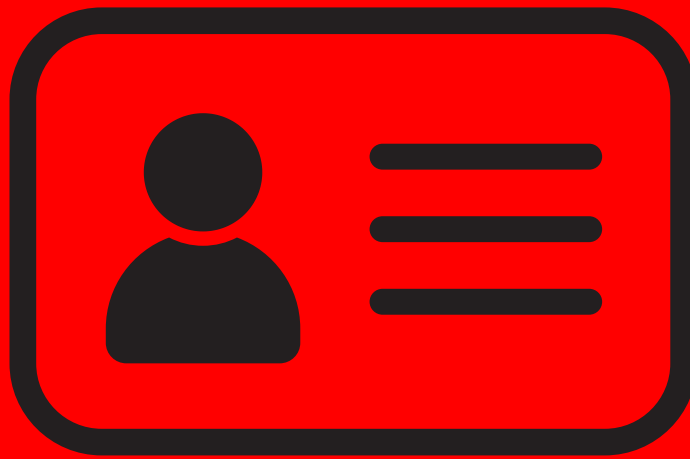

Use Endpoint Protection Software

**Install and keep updated
a good Endpoint
Protection software.**

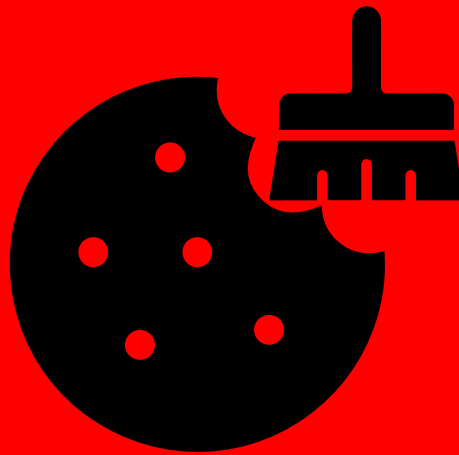

Limit Personal Information Sharing

**Be mindful of what you
share online.**

Clear Cookies and Cache

**Regularly clear your browser
cookies and cache.**

**STAY SAFE,
STAY PROTECTED!**
